

The following are the steps for Product Import functionality which are available in the admin panel:

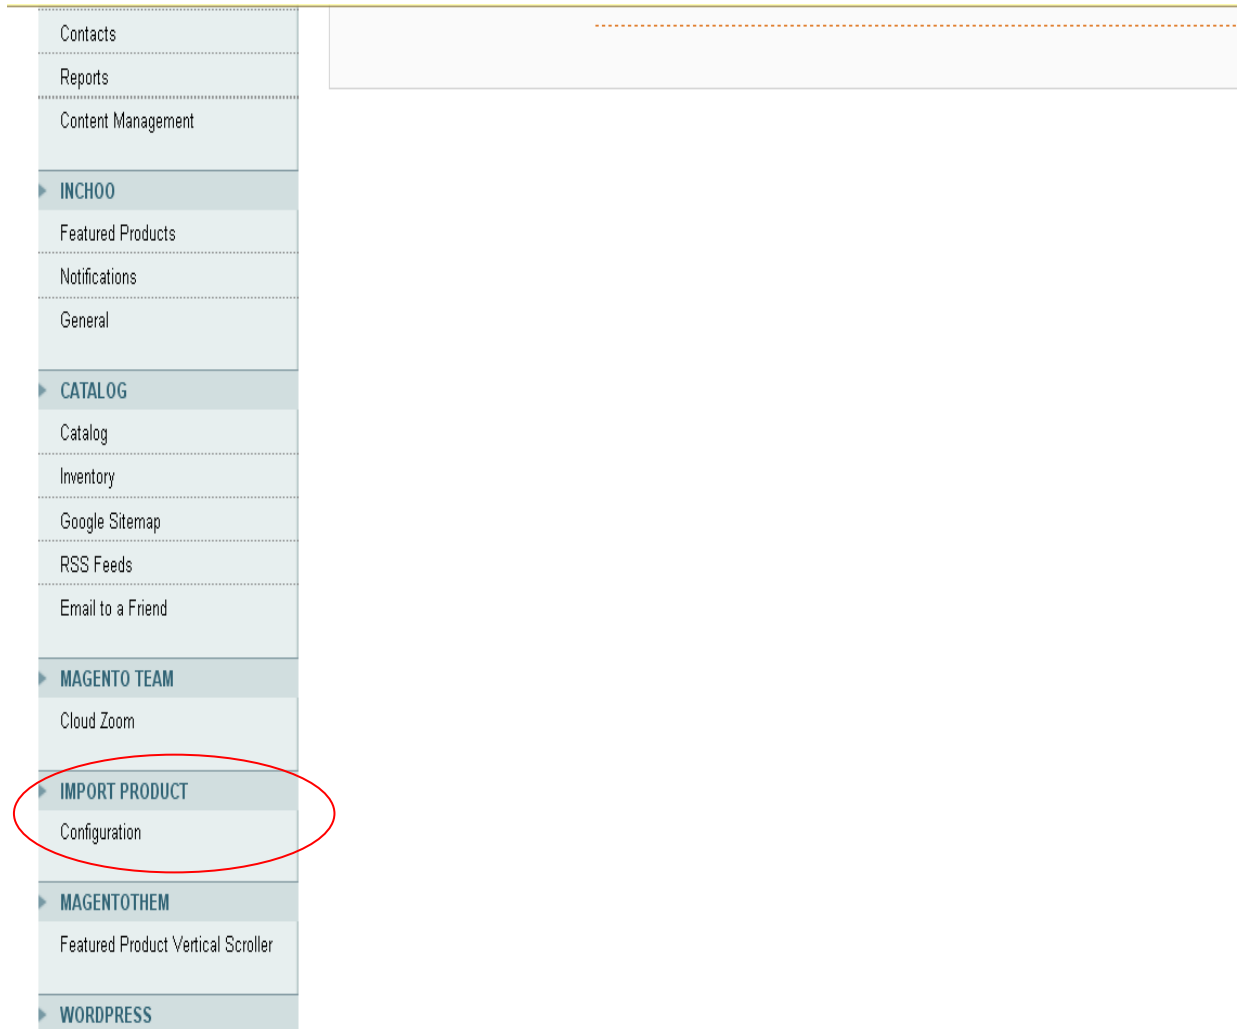

- 1) Login in to admin panel with required username and password.
- 2) Go to system>configuration.

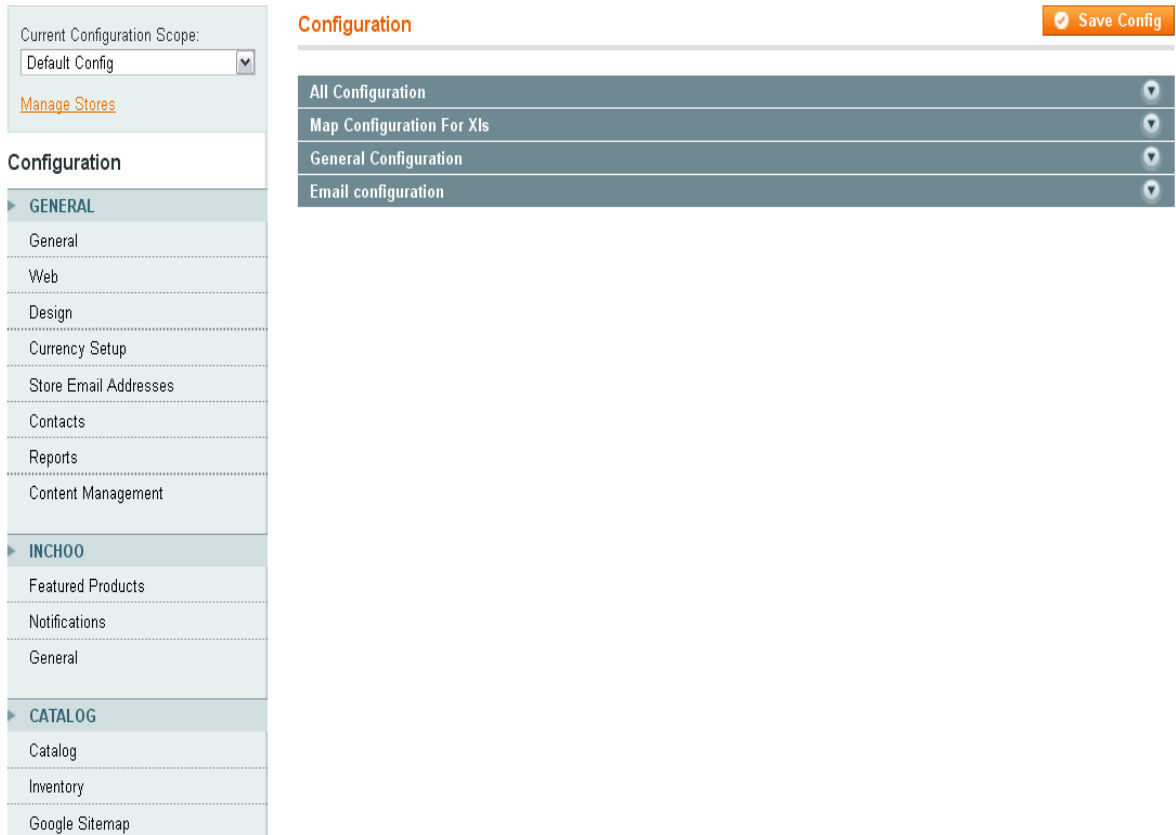

The screenshot shows the Magento Admin Panel interface. The top navigation bar includes 'Dashboard', 'Sales', 'Catalog', 'Mobile', 'Customers', 'Promotions', 'Newsletter', 'CMS', 'Membership', 'Magentothem', 'Reports', and 'WordPress'. The 'System' menu is open, showing options like 'Magestore Extensions', 'My Account', 'Notifications', 'Map Field For Product Import', 'Tools', 'Web Services', 'Design', 'Import/Export', 'Manage Currency Rates', 'Transactional Emails', 'Custom Variables', 'Permissions', 'Magento Connect', 'Cache Management', 'Index Management', 'Manage Stores', 'Order Statuses', and 'Configuration'. The 'Configuration' option is circled in red. Below the menu, a table displays 'Grand Total' for various categories, with 'Configuration' highlighted. The table shows a total of 1 for 'Configuration' with a value of \$0.00. The right side of the screenshot shows a 'No Data Found' message in a table view.

	Grand Total
Cache Management	
Index Management	1 \$0.00
Manage Stores	
Order Statuses	1 \$0.00
Configuration	1 \$0.00
Hayden Thiel	1 \$0.00

- 3) Select from left side menu select Importproduct->configuration.  
Screen shot for the menu is given below

4) After select the configuration use will see the following screen.

Current Configuration Scope:  
Default Config

[Manage Stores](#)

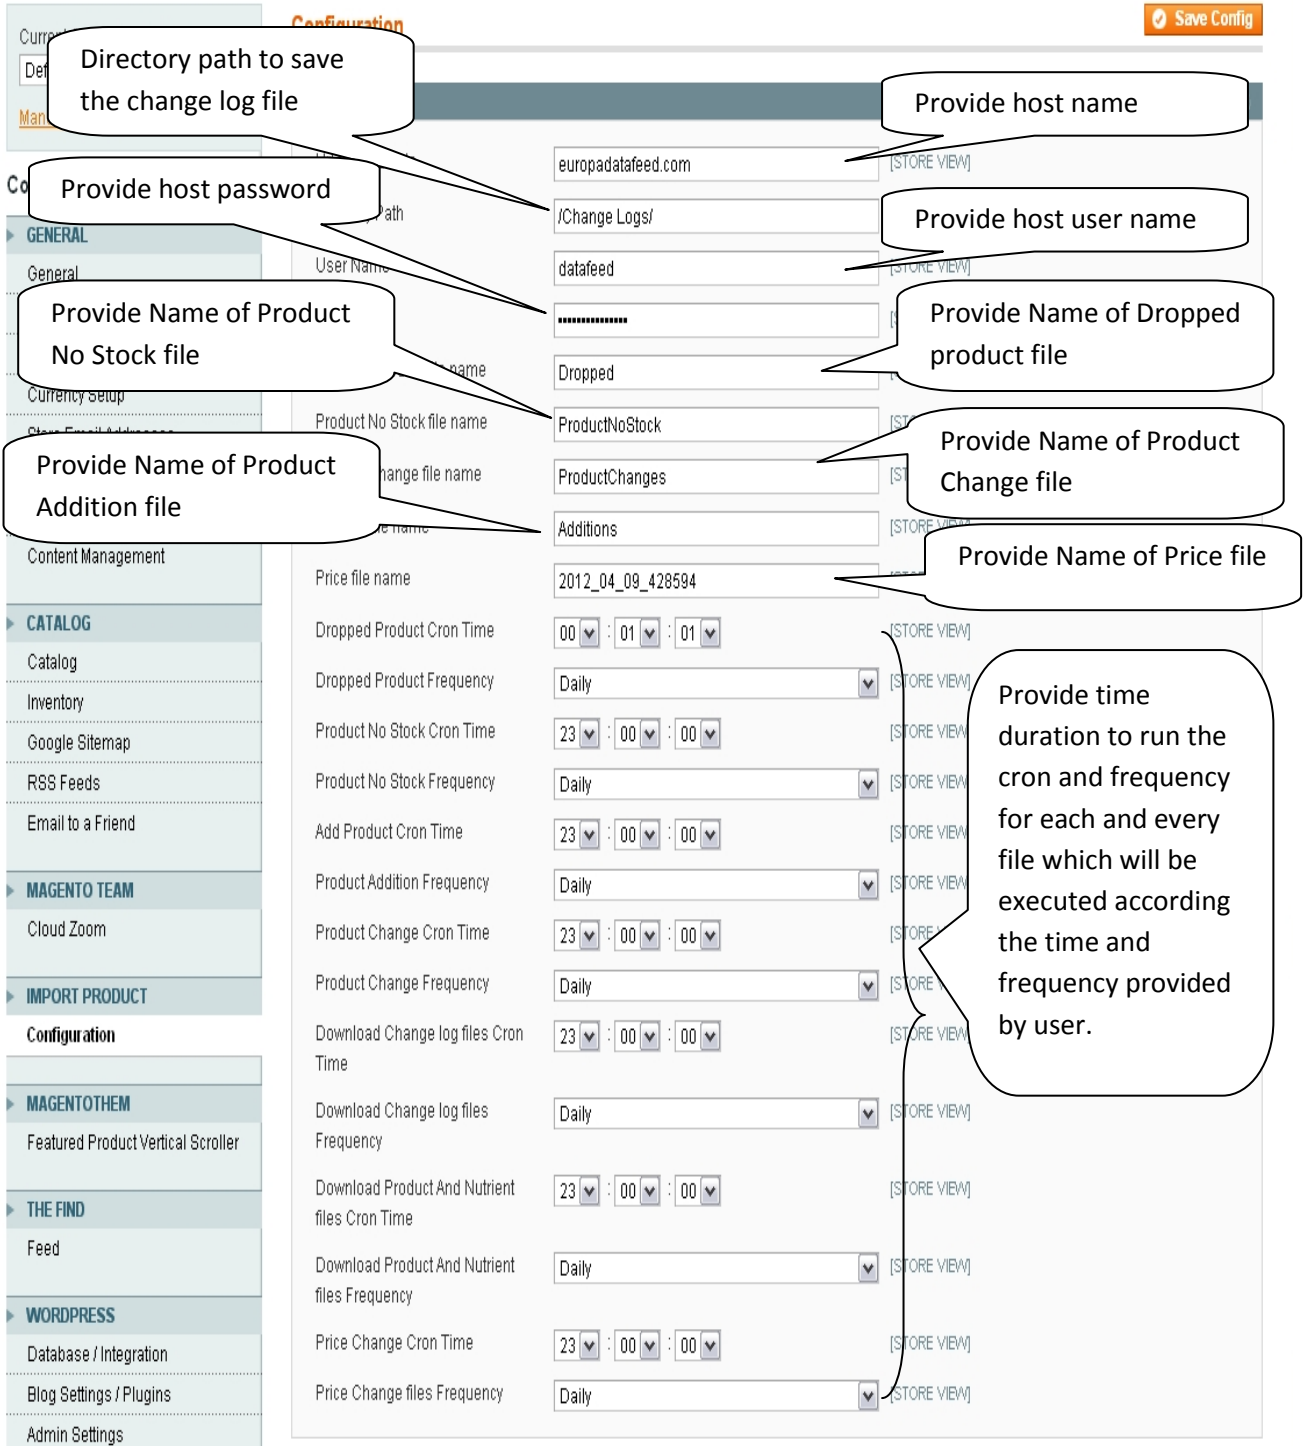

### Configuration

- ▶ **GENERAL**
  - General
  - Web
  - Design

  - Store Email Addresses
  - Contacts
  - Reports
  - Content Management
- ▶ **INCHOO**
  - Featured Products
  - Notifications
  - General
- ▶ **CATALOG**
  - Catalog
  - Inventory
  - Google Sitemap

**Configuration** Save Config

- All Configuration
- Map Configuration For Xls
- General Configuration
- Email configuration

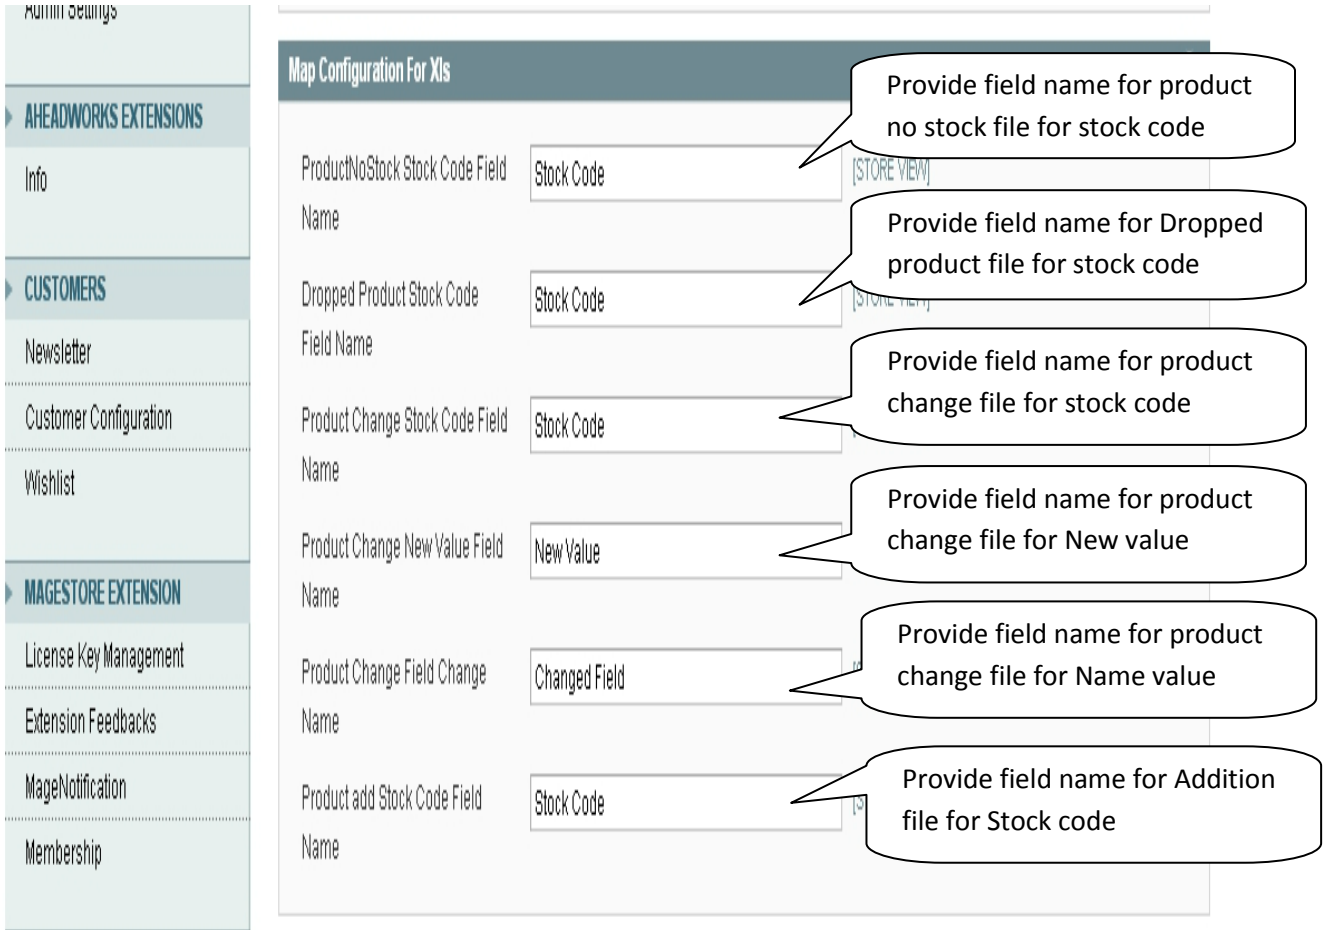

5) Select all configuration for making changes to according to the requirement.

The screenshot shows the 'Configuration' page for 'Import Product' in a Magento system. The page is divided into a left sidebar with navigation menus and a main content area with configuration fields. A 'Save Config' button is located in the top right corner. The configuration fields are grouped into sections: GENERAL, CATALOG, MAGENTO TEAM, IMPORT PRODUCT, MAGENTOTHM, THE FIND, and WORDPRESS. The 'IMPORT PRODUCT' section is expanded, showing various settings for product import. Callouts provide instructions for several fields:

- Directory path to save the change log file:** Points to the 'Change Log Path' field, which is set to '/Change Logs/'.
- Provide host name:** Points to the 'Host Name' field, which is set to 'europadatafeed.com'.
- Provide host password:** Points to the 'Host Password' field, which is masked with dots.
- Provide host user name:** Points to the 'Host User Name' field, which is set to 'datafeed'.
- Provide Name of Product No Stock file:** Points to the 'Product No Stock file name' field, which is set to 'Dropped'.
- Provide Name of Product Addition file:** Points to the 'Product Addition file name' field, which is set to 'ProductNoStock'.
- Provide Name of Product Change file:** Points to the 'Product Change file name' field, which is set to 'ProductChanges'.
- Provide Name of Price file:** Points to the 'Price file name' field, which is set to 'Additions'.
- Provide time duration to run the cron and frequency for each and every file which will be executed according to the time and frequency provided by user:** Points to the 'Dropped Product Cron Time' field, which is set to '00 : 01 : 01' and 'Daily'.

- 6) Provide detail for map field which are coming in the csv file for updating the product the following is the screen shot.

**Map Configuration For Xls**

Field Name	Stock Code
ProductNoStock Stock Code Field Name	Stock Code
Dropped Product Stock Code Field Name	Stock Code
Product Change Stock Code Field Name	Stock Code
Product Change New Value Field Name	New Value
Product Change Field Change Name	Changed Field
Product add Stock Code Field Name	Stock Code

Provide field name for product no stock file for stock code

Provide field name for Dropped product file for stock code

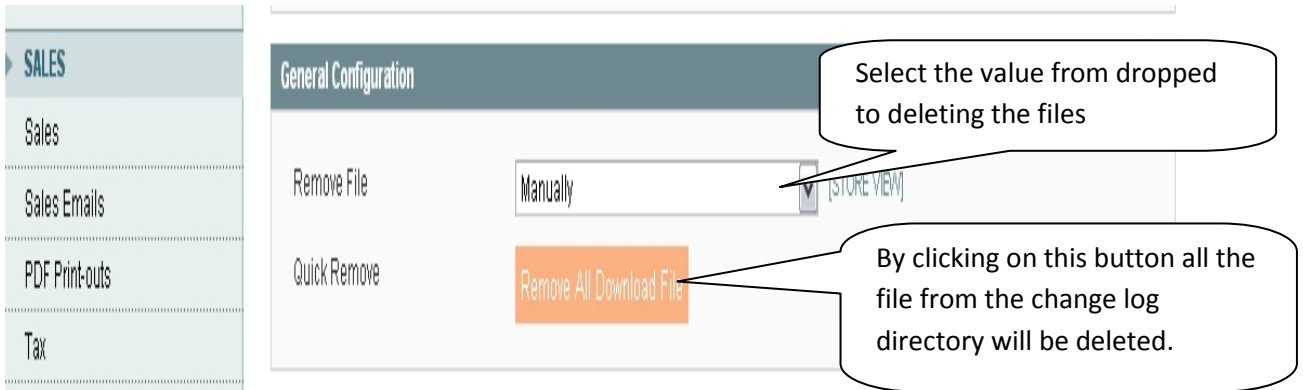

Provide field name for product change file for stock code

Provide field name for product change file for New value

Provide field name for product change file for Name value

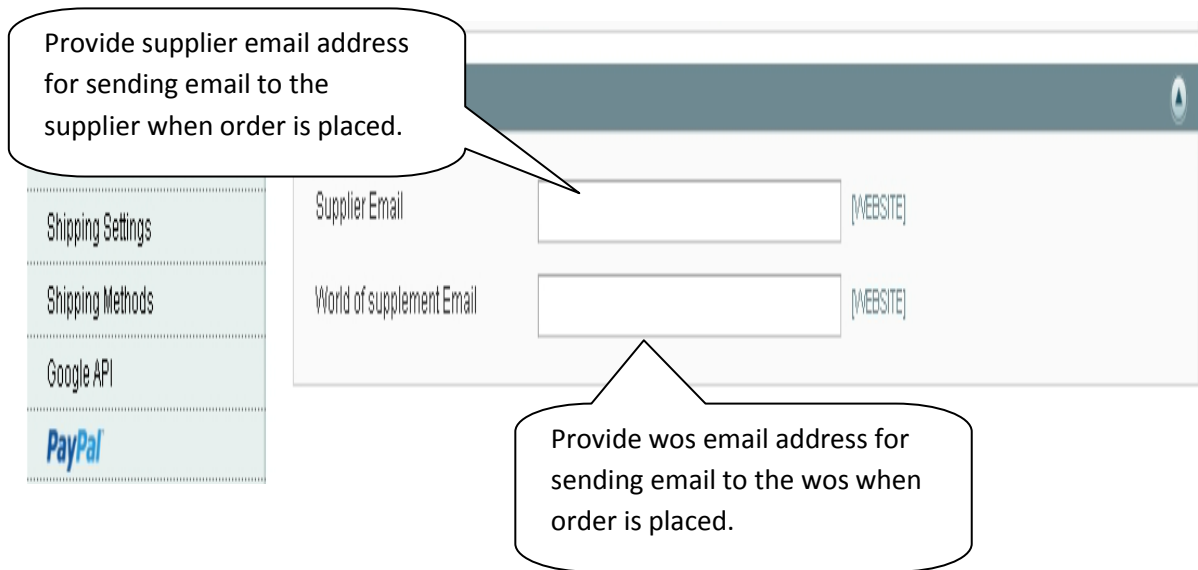

Provide field name for Addition file for Stock code

7) Provide detail for deleting the file which will be saving in the change log directory.

The screenshot shows the 'General Configuration' page in the Magento Admin Panel. On the left is a sidebar menu with 'SALES' expanded, showing 'Sales', 'Sales Emails', 'PDF Print-outs', and 'Tax'. The main content area has a 'Remove File' dropdown menu currently set to 'Manually' and a 'Quick Remove' section with an orange button labeled 'Remove All Download File'. A callout bubble points to the dropdown menu with the text: 'Select the value from dropped to deleting the files'. Another callout bubble points to the 'Remove All Download File' button with the text: 'By clicking on this button all the file from the change log directory will be deleted.'

8) Provide the detail for sending mail after the order is place from frontend side.

The screenshot shows the 'Shipping Settings' page in the Magento Admin Panel. The sidebar menu includes 'Shipping Settings', 'Shipping Methods', 'Google API', and 'PayPal'. The main content area has two text input fields: 'Supplier Email' and 'World of supplement Email', both with a '[WEBSITE]' placeholder. A callout bubble points to the 'Supplier Email' field with the text: 'Provide supplier email address for sending email to the supplier when order is placed.' Another callout bubble points to the 'World of supplement Email' field with the text: 'Provide was email address for sending email to the vos when order is placed.'

Map field for the DF\_Product\_2.0.csv and DF\_Nutrient\_2.0.csv
